

APPLICATION:-Automatic Door Opening

CUSTOMER ISSUE:

Material movement through industrial doors, where the forklift driver must manually open and close the door by pressing a switch on the door controller.

OUR SOLUTION:

We proposed using our radar sensor model: RAD02 on both sides of the door to detect vehicle movement and automatically operate the doors.

ACHIEVED BENEFITS:

Because of automation, drivers save time and energy. Material movement to various departments is now more accessible.

PRODUCT USED IN THE APPLICATION:

RAD02
